Graduate in Management of Business and Technology

Business Engineering School La Salle

BES La Salle

Innovative and modern training model that integrates the advantages of new technologies together with an innovative management in a global context.

Technological Innovation and Business Park

Cutting-edge technology, research and technological innovation. Management Laboratory.

Enterprising Spirit

Promotion of the development of enterprising ideas from within companies and for the creation of new business projects.

Laboratories and Facilities

Installations and advanced technical laboratories that allow students of management programmes and of technological studies to develop projects in real life environments and with real teams.

International Nature

Wide and renowned network of Business Schools and Universities throughout the world. Exchanges of students, teaching staff and contents, both at an attended and virtual level, with all universities of the network.

Faculty

Active, professional teaching staff and renowned academics both at the national and international level.

Alumni Association

More than 1.000.000 students worldwide.

OFICIAL BOLOGNA DEGREE

International Credentials

Founding Member

Differential Methodology

Active and flexible approach, encouraging team work and personal relations, and with the rigour of a long standing University with 300 years experience.

Prestige and Innovation

74 universities throughout the world and important and recognized business schools.

Business Creation

Area for the creation of businesses that helps entrepreneurial students to get started. More than 90 businesses created since 2001.

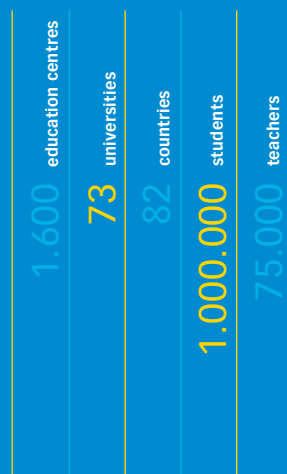

Business Networking

Constant dialogue with the business world. Job Centre and Service for Professional Development and Guidance. Permanent upgrading of programmes following the changing strategies, and needs of the companies and society.

New Technologies as a Driving Force

Teaching the student the functionality and application of available and emerging technologies. Advanced technologies are considered in the study plans, conception of installations and services.

La Salle worldwide

Innovation and creativity

With more than 300 years of history and 74 Universities throughout the world. La Salle is a founding member of the Ramon Llull University and has a long standing global recognition.

The first engineering studies in Barcelona began in 1903. Since then, innovation has always been present in the Lasallian spirit and has resulted in the current campus and its activities. By means of a constant permanence at the forefront of knowledge, La Salle is synonymous with innovation, creativity, entrepreneurship, and driving force of synergies in the business and university worlds.

The degree in Management of Business and Technology was born as an innovative concept based on the following paradigm, "The new management must be a technological management". To meet the needs of a rapidly changing society it is essential to have a broad technological and innovative knowhow so as not to be left behind. It is within this new concept of technological management that BES La Salle embraces the undergraduate business programs and prepares future strategies.

Global network

In a globalized economy, the La Salle Campus has 74 centres all over the world and many collaboration agreements with other prestigious universities.

The La Salle network of international collaboration agreements for the exchange of knowledge and experience is highly valuable for our students. It offers the possibility of studying at other universities and for students to meet and relate with students of more than 54 nationalities in its campus, a highly enriching personal experience.

Some universities with which we develop projects:

Accademia di Architettura	Ticino - Switzerland
Bialystok Technical University	Poland
Christian Brother's University	Memphis, USA
des Telecommunications (ENST)	France
d'Architecture de Clermont - Ferrand	France
ECAM	Lyon - France
École Nationale Supérieure	
European School of Economics	Italy
École Nationale Supérieure	
Fachhochschule Regensburg	Germany
Fachhochschule Ulm	Germany
FUDAN University	China (Shanghai)
Group ESIEE	France
Haute École Roi Baudoin	Belgium
Hogeschool Antwerpen	Belgium
Hogeschool voor Wetenschap	Belgium
Institut International de Commerce et Distribution	Paris - France
Institute of Chalkis (TEI)	Greece
Instituto Tecnológico De Monterrey	Mexico
International University, Geneva	Switzerland
ISAB	France (Beauvais)
ISAIP-ESAIP	France (Angers)
Katolieke Hogeschool Kempen	Belgium
La Salle Cuernavaca	Mexico
La Salle Pachuca	Mexico
La Salle Philadelphia	USA
Manhattan College	New York, USA
St. Mary's College of California	USA
St. Mary's University of Minnesota	USA
Technical University of Denmark	Denmark
Technische Universität, Berlin	Germany
Technological Educational Tecnológico de Antioquia	Colombia
Texas Christian University	USA
UniLasalle	Canoas, Brazil
La Salle Bogota University	Colombia
La Salle Chihuahua University	Mexico
La Salle University	Mexico city
La Salle Cancun	Mexico
La Salle Morelia	Mexico
La Salle Noroeste	Mexico
La Salle Guadalajara	Mexico
Universidade Autónoma de Lisboa	Portugal
Università La Sapienza	Italy
Università di Ferrara	Italy

Université Aix Marseille III	Aix-en-Provence - France
University College Dublin	Ireland
University of Applied Sciences Zürich	Switzerland
University of La Salle	Manila, Philippines
Vellore Institute of Technology	India
Warsaw University of Technology	Poland

On campus

On campus, students can find an excellent environment to study and all the necessary services to develop their personal skills.

- Around 75.000 m² area
- 7 buildings
- Over 30 techno-management laboratories
- 4.000 students from 53 different countries
- Over 400 teachers
- Library
- Business incubator
- Conference/Convention Rooms
- Fitness and Sports Center
- Restaurant
- Gardens
- Private car park
- Wireless connection

Martín Casals Student

"In my opinion have enriched myself development in unimaginable ways"

The degree of La Salle, Barcelona, enabled me to open my mind, being able to expand my creativity, and perceive things in different ways. As La Salle Barcelona offers the opportunity to interconnect with people from all over the globe which in my opinion enriched my development in unimaginable ways.

Martín Casals

Services

1. Technology Transfer for companies

- You will participate in the development of current projects for leading companies within their sector.
- You will learn to work in a team, acquiring skills to enter the labour market.

2. Innovation Park

- If you are a person with an entrepreneurial spirit, our Business start-up area can provide the necessary support to create your own technological business.

3. Research groups

- You can apply for grants to participate in Research and multidisciplinary projects.

4. Fitness and Sports Centre

- A place to relax body and mind. You can choose to go to the gym, the climbing facility the swimming-pool, the squash court, the basketball area, and the football fields, all open to our students.

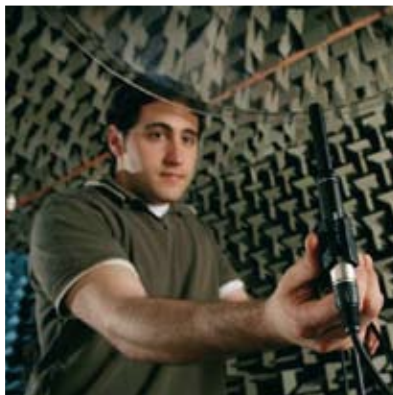

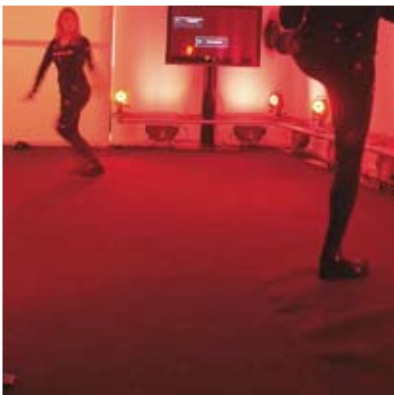

5. La Salle Alumni Association

- A steady network of former students, who through their own experiences, help the personal and professional developments of students and associates. The Association seeks to promote relationships between universities, firms and associates.

6. Professional Training

- Once you have finished your graduate studies you can improve your knowledge and training with postgraduate studies such as Masters and Doctorates, professional development courses, and excellent executive courses, at the Business Engineering School La Salle (BES).

Isabel Oller

Director of Undergraduate
International Business
Programmes

“The degree in Business Administration is the only program in Europe with the most innovative medialabs and userlabs”

To manage means to be enterprising for the benefit of individuals as well as society. It means commitment and responsibility; to know the importance of the significance of work, of the importance of working in a team and self-confidence. With this basic knowledge, the degree in Business Administration is innovative when it places technology at the hands of management so as to respond in a faster and more efficient manner to the necessities of a global and technological society. The degree in Business Administration is the only program in Europe with the most innovative medialabs and userlabs available to management in a multicultural environment unique to Barcelona.

Isabel Oller
Director of Undergraduate International Business Programmes

Bachelor in Business Administration

During their degree students gain in-depth knowledge that they can apply in a real world context. Students develop multiple skills necessary for professional development.

Aim of the Programme

The Bachelor in Business Administration entitled by Graduate in Management of Business and Technology will provide students with the necessary knowledge and technical skills to understand the modern World of business, preparing them for a future of professional success. The aim is to offer students a setting for analysis, in order to be able to conceive the World and solve problems-independently of the industry, career or country they come from or where they are.

Students at the end of their degree will have good knowledge and understanding of the area of study, including advanced aspects of the area. They will be capable of implementing their knowledge and understanding in a professional way:

- Elaborating arguments
- Defending positions and solving problems
- Collect and interpret relevant information in order to express views in significant social, scientific and ethical themes.
- They will be able to communicate information, ideas, problems and solutions to expert and non expert audiences
- They will have developed the necessary learning skills to continue studying autonomously

Students will learn to analyze diverse situations; considering the needs and goals of stakeholders; to think about creativity, efficiency and effective solutions; and to design the best ways for implementing strategies. Independently from the activity carried out, from the planning of a new product to buying a house, students will have a completely innovative and efficient view.

Differential factors:

Professors work to provide innovative and intellectual creations in the most up-to-date settings. They work as bridges in reseach and practice, being involved in business.

The creation of challenges by professors, in an intellectual and collaborative environment, through questions and a constant interaction with the students, enrich student's experiences. Courses also include debates and discussions.

Students get to know the use of simulators in the learning of concepts, discussions, case studies and team projects. The classroom methodology is adjusted to the needs of the group of students and the subject.

Class sharing by students from different degrees provides a global and comprehensive understanding of the social, cultural and economic reality of the world we are living in.

The greatest challenges of today's society, questions and problems cannot be addressed in one discipline or profession, and for this reason the design of the program combines business with arts and science.

The programme combines languages, international relations, technology and sports subjects.

Through all these disciplines, students develop a global perspective of the business world and get prepared to occupy management positions within a global economy and changing world.

Technology and Management:

The programme includes technology subjects, resulting in an innovative view of management that helps students to define and solve problems in a technologically complex world.

The programme takes into account the importance of innovation. The fusion between technology and management, is one of the differential focus of the Business Engineering School in Business Studies and is justified by the following points:

- Today's labour market demands speaking various languages. Students are international, following subjects in English, and two subjects in Spanish, so they will speak Spanish, English and their native language.
- The concept of collaborative research with the companies from the park, the support to innovation within companies to help in the modernisation of productive and technological management processes, the involvement of La Salle in the development of technological business strategies for companies, the support to entrepreneurs in the creation of global businesses' has enabled a mutual benefit between the university and the business world, which is visible in the program and explains the demand for international graduates in business studies.
- The La Salle Business Studies assists students in adding an international and global dimension to their training in business studies. Through the international contacts network of colleagues and professors, students have an open door to the world.
- Students are challenged to develop innovative and creative solutions to contemporary problems posed, in the area of management skills development and services to community through curricular and extracurricular activities.
- From an international point of view, the profile of the BES, Bachelor in Business Administration is recognised autonomously by organisations of prestiges such as ACM and Career Space (Project created with the support of the European Commission, a consortium of nine leading companies in Information and Communication Technologies (BT, Cisco Systems, IBM Europe, Intel, Microsoft Europe, Nokia, Philips Semiconductors, Siemens AG, Thales).
- Companies highly value these multidisciplinary profiles. It is clear that any important project includes knowledge of very different areas. In these cases it is essential to have a profile with knowledge of technologies, who can integrate and communicate coherently.
- The programme is aimed at students who return to their countries to work or who work at an international level.

**Laura
Meca**
Student

“When I arrived there I could not imagine that it will give me more than I was hoping so”

I couldn't have hoped for more from my experience at La Salle. I've learned so much by studying in an international environment, working as part of a team with students from so many different countries. The academic is very wide and varied, allowing you to get a broad understanding of the business world. It's a privilege to study at such a prestigious university.

Laura Meca

Why study at La Salle?

The undergraduate course presented includes specific and unique traits which distinguish it from other training offers, in response to the needs of society and the business world.

INNOVATION

Innovation is one of the main axis of the culture and activity of La Salle. The Undergraduate course prepares expert managers to discover, analyse, advance and confront permanent changes and the new professional challenges with the guarantee of the best knowledge, capacity for decision, training and business management tools.

ENTREPRENEUR SPIRIT

The La Salle Technology Transfer Area includes companies and professionals, incorporating new concepts and processes, as well as advanced technologies, in their business projects. In this way, companies benefit from the knowledge, experience, research, highly specialised teams and permanent training. The contact with companies is visible in the design of the Undergraduate course, students can participate in projects which will allow them to get in contact with real projects.

La Salle accompanies students and entrepreneurs in the initial stages of the creation of new companies, offering all the necessary help to start their business projects through the Business Creation Area. More than 70 companies have been created since the start of this area, many of them from End of Degree projects carried out with the support of tutor teachers.

Multicultural
Environment

NEW TECHNOLOGIES AS A MOTOR OF CHANGE

A great number of degrees, with the greatest prestige at a world level, have been created within engineering schools and in contact with technological companies, technology and computer systems management. This technological component, important in the past, is once again key and crucial, as different international reports point out. No company has any future without an efficient and intensive use of expert systems of knowledge, analysis, information and management, as a support to decision making.

The Bachelor in Business Administration use of advanced situations analysis, discussions and the solution of real and close cases, training students in technology and information systems management.

INTERNATIONAL CHARACTER AND GLOBAL VIEW

La Salle is founding member of IALU, formed by world renowned universities, and a valuable network of global contacts. This collaboration promotes the live and virtual exchange of teachers and students among universities from the network.

The international character of La Salle and the awareness of training entrepreneurs and professionals, who develop their activity in a multicultural and international setting, are clearly visible within the programme. The study abroad programmes carried out in New York, Abu Dhabi, Mexico and California, among others are a practical and live expression of the international character of the programme. In all these stages specific intensive programmes and visits to companies are undertaken, under the supervision of a faculty members from both universities.

ETHICS: RESPONSIBILITY AND SOCIAL COMMITMENT

Ethical values and a social awareness are at the core of the La Salle education from the very start. The dialog and problems generated and made evident with the globalisation process and incorporation of new technologies has pointed out the importance and urgency of incorporating values to the business strategy and the awareness of managers. As a consequence, the degree is characterised as an ethical, social and human sense, considering the optimal use of limited resources and the respect for the environment, RSC, philosophy of technology. These values are not regarded as sidelines of the business strategy, but as the only way for real and sustainable progress, commitment to people and to the future generations. These distinguishing traits are visible in all the subjects of the undergraduate course, adjusting the programme to the needs of our global and dynamic society.

Lav Mehta Student

“A great university along with an awesome city compliments the entire experience of studying here”

After spending months searching for a university, I finally decided to come to La Salle to pursue my bachelor’s degree. La Salle was a better option than other universities in Barcelona for various reasons, mainly because of its diversity.

Diversity not only in respect of the courses offered but also in respect of the students who come from different countries and cultural background and the professors who represent different fields of education and countries. The course includes topics from fields of technology, finance, marketing, sociology and many more to give an all-round exposure to the participants. Core studies being the most important part, we also have many other co-curricular activities like the Model United Nations conference, finance and entrepreneurship club, student council, sports league, etc.

Coming from an extremely different educational background I thought that I would have many problems to integrate in the university.

Although I had a few difficulties, I could easily overcome them with constant assistance from professors, administration and co-students.

A great university along with an awesome city compliments the entire experience of studying here. I would like to sum up stating that La Salle has provided me with quality education in a diverse culture providing me with enhanced future options.

Academic Programme and Methodology

The teaching method adopted in those courses will mainly consist of continuous assessment, theme-based lectures, group works, written cases analysis, extensive classroom discussions and exams. Students will also be expected to undertake projects that demonstrate the practical application of theoretical contents covered in lectures.

LA SALLE

- Final Degree Projects with Students from Engineering, Architecture and Management
- Promotes student led initiatives, innovation and an entrepreneurial spirit
- Believes in continuous improvement with a critical eye
- Offers holistic, comprehensive training for all
- Promotes cooperation, confidence and creativity as values

THE ONLY BUSINESS ADMINISTRATION DEGREE IN BARCELONA WITH THE FOLLOWING CHARACTERISTICS:

- A Technological and Business university center that provides a quality academic education, a unique methodology and a close proximity to the world of business.
- A native English speaking faculty with excellence in teaching and research.
- A campus with the latest and most exclusive technological laboratories in a business school in Europe.
- An educational model that combines scientific and technical development with practical knowledge.
- An educational model with international growth and expansion and with a global presence consisting of a network of 74 university centers in 5 continents.
- The possibility of studying at different network campuses.
- The opportunity to create your own company

Professional and Personal Development

As a part of the Human Resources and management Skills course, the Bachelor of Business Administration also includes outdoor activities the purposes of which are:

- To develop the decision-making, leadership and cooperation skills of students
- To develop the ability to be able to deal with changing situations
- To encourage participants to promote team building
- To teach students to see their team-mates' points of view
- To show students that it is possible to make good decisions in new challenging situations

Kristian Dobrev

Student

“The cultural diversity of both professors and students has enabled me to develop very quickly, both professionally and personally”

From the very start of my time at BES La Salle I was convinced that I had made the right decision to come here. The combination of its beautiful campus, its outstanding learning methodology, and the business environment of Barcelona has shaped a study environment one can only dream about. I got to know all my professors and received the kind of personal attention I would have never gotten anywhere else.

More importantly, I made lots of friends here which I am sure will remain so forever. The cultural diversity of both professors and student pared me for the business world of the 21st century. During the year we go on interesting field trips and do numerous projects which, together with the practical professional experience of the professors, give the Bachelor's programme an important real-world approach to actual business situations.

To sum up, I have no regrets whatsoever about choosing BES La Salle to do my Bachelor of Business Studies and Sport Management.

Kristian Dobrev

Student projects

The Bachelors in Business Administration assists students in adding an international and global dimension to the training in business studies. The students are challenged to develop innovative and creative solutions to contemporary problems posed through curricular and extracurricular activities like projects such as United Nations Model in New York and Global Sports Forum in Barcelona.

UNITED NATIONS MODEL

La Salle Model United Nations Society aims to teach the young leaders of tomorrow more about the international relations system by giving hands-on experience by way of preparation for one of the world's leading Model United Nations Conferences held each year in New York City.

- A NMUN conference simulates some aspects of the UN
- Students represents a country as UN delegates and are assigned to a committee
- About 5000 students participated in the simulations this year Benefits of the NMUN Experience
- Learn about how the United Nations Works and develop a broad understanding of its complex nature.

Benefits of the NMUN experiences:

- Broaden your understanding of countries and cultures
- Increase your awareness of critical world issues and deepen your understanding in three important international topics
- Develop your skills in peaceful negotiation and sharpen your ability to persuade, conciliate and resolve disputes
- Build your self-confidence and improve your leadership as well as public-speaking skills

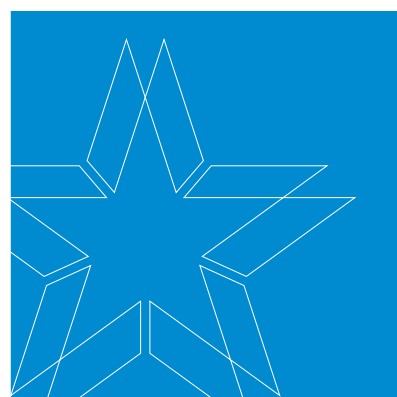

SPORTS FORUM CONFERENCE

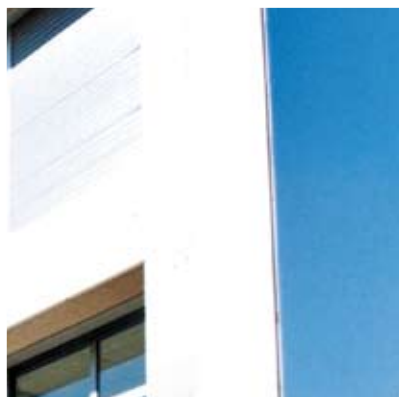

Objective of the conference:

- Mirroring as it does the trends and changes taking place in our societies, sport has a key role to play. The Global Sports Forum Barcelona invites all those involved in sport, business, politics and social issues at the very highest level.

Students do:

- Attend all sessions (slit up in groups)
- Take notes on general ideas and quotes
- Send quotes and summarize session

Vedran Kusljagic

2nd year running
in LSMUNS

Vedran Kusljagic, 2nd year running in LSMUNS:

"After two years doing the Model United Nations, I have learned a lot about diplomatic ways. The experience has taught me a lot about how to negotiate with a broader and much more diverse group than the one we face with every day.

Furthermore, it has taught me how to be able to confront a huge crowd without crumbling from nervousness. Being able to do all the things we have done in the meetings, it was trully educational and I will cherish the memories forever.

Not to forget that New York, being the greatest city in the world adds to the experience as well."

Claudia Goetch

2nd year running,
Head Delegate
Best Thesis 2009

Claudia Goetch, 2nd year Running; Head Delegate:

"Before I joined the La Salle Model United Nations Society, I knew that the UN had an array of unloving critics, and I was admittedly skeptical of the true possibilities of success of the organization in the long run.

In fact, in my admissions essay for my first conference, I wondered, "Is there hope for an international community system?"

However, participating in the conference and being surrounded by hundreds of young people who are truly passionate about promoting peace, human rights, justice, respect and human progress, has given me that hope.

I have by no means become naïve on the matter; quite on the contrary, I believe there is a long way ahead of us, and that the United Nations urgently needs to undergo reform in order to convey meaning to its undertakings. Nonetheless, the UN is currently the only forum that has achieved to voice the common denominators of world opinion - and what better platform than the understanding of our similarities in order to achieve consensus on our differences?

I would like to take this opportunity to thank BES La Salle for giving us students the opportunity of participating in something bigger than ourselves, for letting us catch a glimpse outside the warped cynicism of the business world, and for allowing us to learn and grow through this real world experience."

"My experience as a former student at La Salle Universities, in Barcelona, has given me great understanding for the differences in culture and which opportunities and challenges you face when working with people from other countries. I learned and developed the skill of always being open-minded, patient and thorough in my work, which I have greatly appreciated since I started working."

Genia Babaeva Student

“The diverse student body and the quality of teaching will prepare me to distinguish myself from others and work in the business world.”

Today’s businesses expect a variety of skills from Bachelors. This is why I chose the La Salle International Bachelor Program. It offers me the program I was looking for with the necessary knowledge and technical expertise to understand the contemporary business world and develop my interpersonal skills. I looked for a business program, which integrates with politics, so the provided minor in International Relations is the perfect solution to me.

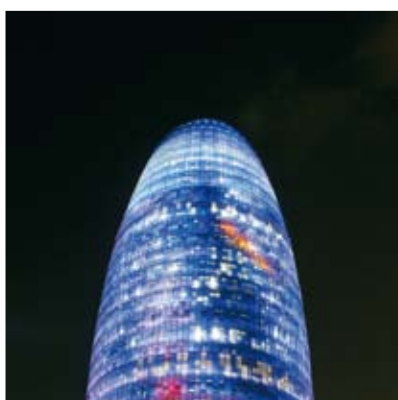

The experience of working on a regular basis in teams made up of students coming from all over the world helped me to understand cross-cultural differences, so that I can face the opportunities and challenges coming from working with a diverse workforce. Furthermore I appreciate that professors not just provide us with theories, but also with practical case studies and their own working experiences. In overall I think that the offer of the program, the diverse student body and the quality of teaching will prepare me to distinguish myself from others and work in the business world.

Genia Babaeva

Living and Studying BCN

The Barcelona of the 21st century is an European capital of astonishing cultural energy and passionate for progress. A city with day-to-day life brings together every imaginable facet, of the most diverse activities. Barcelona is a gateway open to harmonious coexistence and dialogue between different languages.

The importance of tourism and the city's historic role as a point of encounter between cultures means that other languages, such as Catalan, English, French, Italian, Spanish, Portuguese, German and various regional forms of Asiatic, together with a numbers of Asian languages, are also regularly heard in the streets.

“Barcelona is a gateway
open to harmonious
coexistence”

Graduate in Management of Business and Technology

BES

Business
Engineering
School

La Salle Business Engineering School welcomes applications from students with the appropriate school qualifications and necessary personal profile to successfully complete the studies program leading to the Bachelor's degree.

Students must submit the following documentation to initiate the enrolment process:

- Complete Admission Application Form On Line: www.BESLaSalle.net/bachelor/afom
- Photocopy of passport or ID card
- Original Secondary School Records
- 4 Passport Photographs
- Two recommendation letters. From the principal, counselor, teacher or previous work experience
- Scores on the Test of English as a Foreign Language (TOEFL). The minimum TOEFL result must be 71 –iBt
- Required Essay in English (on a freely chosen subject, at least one page long)
- Required Essay in Spanish (on a freely chosen subject, at least one page long, to determine your Spanish level. Your level will not affect your admission process)

The international students must submit the additional documentation:

- Copy of bank transfer receipt of €200 (non refundable), in concept of Admission Process Fee
- Health Insurance is mandatory once you are admitted (deadline two weeks before the University starts)

In the assessment of candidates applications, the Head of Admissions, together with the Admissions Committee, revises the following credentials: Intellectual aptitude and skills, responsibility and clarity of goals and moral integrity. The academic record is considered the most reliable measure of one's potential academic performance. However, extracurricular accomplishments may strengthen an application if they are to indicate special talents, maturity, persistence and motivation.

NOTE:

A student entering the Business Engineering School (BES) from another college or university must meet the previous secondary school requirements. Students must also present an academic record with a minimum GPA of 2.3 in transferable academic courses. You must apply for this documentation from the Spanish Distance-Learning University (UNED), please see www.uned.es/accesoUE.

Conditional Acceptance

Students with TOEFL scores lower than 71 - iBt can also get admission, with the condition of enrolling in a Full Time English Language Program. www.ets.org/Media/Tests/TOEFL/tclists/BOTH_s.html

In September of 2007, Ramon Llull University received a favourable report from the European University Association (EUA) on the Institutional Evaluation Program that is based on an overall evaluation of the University, led by university experts of recognised international prestige. It must be noted that the RLU is the first private Spanish university to obtain this type of recognition.
