HUDSON'S COMMENT

“We try to give students an understanding of the demands of the current job market and how they can effectively compete for the roles they want. The sessions are designed to get them thinking not only how to sell themselves and their skills, but also to see their resumes, applications and interviews through the eyes of the employer, so giving them a better understanding of what employers want to see.”

HOW IT WORKS

In the second or third year of study at ACN, students apply to us to undertake an internship. An external consultant places our students in the internship program. The work is voluntary although some companies may provide a stipend. The internship duration is tailor-made for our students. For example it could be one month full-time or one day a week part-time for six months.

STUDENT'S COMMENT

“ I worked as an intern for three months and got an actual job from them.”

“ I had a great experience, working for Captain Cook Cruises. They have a great reputation for accepting interns. The various tasks have involved me becoming more competent with applying multi-skills in different work areas.”
