

If you have already submitted your health clearance forms to Med+Proctor, please ignore this.

Aloha Visiting Students,

State of Hawai'i law mandates that certain health requirements be cleared before students can enter into postsecondary institutions (Hawai'i Administrative Rules, Title 11, Department of Health, Chapter 157 Examination and Immunization) which may be found [here](#).

The state of Hawai'i requires all students to be immunized for measles (rubeola), Tetanus-Diphtheria-Acellular Pertussis (TDAP), Varicella (VCV), and Meningococcal Conjugate (MCV). **I have attached both Forms D and E, please review and have it signed off by you and your physician, then [submit it through Med+Proctor on your MyHPU portal](#). A tutorial on how to upload to Med+Proctor is attached [here](#) should the you need more guidance.**

If Med+Proctor requires proof of TB vaccination and you are a one-semester visiting student, **please ignore.*

If you had any questions regarding health immunizations, please send them to registrar@hpu.edu.

FORM D (MMR):

- Two doses of live vaccine or two doses of MMR separated by at least one month are required.

FORM E (TDAP-VCV-MCV):

- One dose of Tetanus-Diphtheria-Acellular Pertussis (TDAP).
- Two doses of Varicella (VCV) separated by at least one month or a Varicella (VCV) Titer with blood test results attached are required.
- *If you plan to live on-campus in the dormitories, then one dose of Meningococcal (MCV) is also required.*

Measles immunization may be waived if:

- Student is born before 1957 (provide proof of birth date)
- Physician had confirmed diagnosis in the past or serologic evidence of immunity is presented (provide written statement from your physician; statement must be signed and written on official stationery).

Note: international students may have their immunizations taken in their home country.

Mahalo.
